TOWN COUNCIL MEETING WAS SHORTEST SESSION THIS YEAR

The Monthly Session Lasted Only One Hour and Fifty Minutes—Only Small Amount of Business on the Agenda—Policing of Palmer Hill Causes Quite a Debate, Corner Will be Policed.

The regular monthly meeting of the town council was held in the council chambers on Wednesday evening last and was the shortest meeting on record this year. The usual correspondence, passing of accounts and other business kept the council in session for only one hour and fifty minutes.

The greater part of that time was given over to the discussion of the means of policing the Palmer Hill at the hours when the school children are going to and from school. Every member of the council was of the opinion that it was a very dangerous corner and that the school board's action in making a move to have this dangerous corner policed to avoid accident to school children was to be commended.

His Worship the Mayor started the discussion when he reported to the council that Chief Wentworth was on duty at the Palmer Hill intersection from 8.30 to 9 in the morning, from 1 to 1.30 at the noon hour and again at 3 o'clock. He had approached the chief about the matter and had asked upon whose authority he was policing the corner. Chief Wentworth replied that he had been asked by the board of education to perform that duty.

Mayor Hewson said that the idea of undertaking too much. When do you expect to sleep?

Commenting on this conversation, his Worship pointed out to the council that they could not expect the chief to be on duty night and day. "The time is coming, gentlemen, when on account of the heavy motor traffic that we will require the services of a night and day man."

Alderman Moxley said that the idea of policing the corner was an excellent one.

Reeve Fonger was of the opinion that it was the council's duty to see that this dangerous corner was policed.

Mayor Hewson said that he thought the school board should have approached the council before ordering the Chief of Police to do duty at the corner.

"It is a really dangerous spot. School teachers cannot be expected to pilot the children across the intersection," said Alderman Wilkins.

Alderman Durham said that the chief had all he could do now.

The Mayor and Alderman Moxley agreed that some one in uniform should be on duty at the corner. "Don't let the policing of the corner go until some one is killed," was the advice of Alderman Wilkins.

position of Treasurer and collector. He filled this position during the early days of the Water Commission without remuneration. He also served on the school board and was prominent in any project for the advancement of Grimsby and the welfare of its citizens.

He was a business some thirty years ago. Mr. Palmer lived a retired life at his beautiful home, Leighton, on Paton Street. In religion he was a devout member of the United Church, and was a very active member in politics, being a Liberal and a strong supporter of his party.

In 1873 Mr. Palmer married Emma Calender of Bowmanville, who predeceased him in December, 1918. There were two children, a son who died as an infant and a daughter, Mrs. (Dr.) Fred A. Roseburgh, of Hamilton, who survives.

The funeral took place on Saturday afternoon from his late residence, interment being made in Queen's Lawn Cemetery. Many of the older members of the town gathered to pay tribute, as did Mayor A. Hewson and Reeve Fonger, representing the town.

In Municipal Life

He was prominent in the incorporation of the Village and his name appears many times in the minutes of the meeting held prior to the incorporation of Grimsby as a Village in 1876. His work in this connection won him a place on the first village council and he remained on the council for five years.

His passing removes the last of this body of public spirited men. He was also the first member of the Water Commission, and acted in the

All Fruit Bowling Tournament Sat'day

Large Entry Already Received—Will Certainly Advertise Grimsby as Centre of Fruit Belt.

Preparations are now about completed for the holding of the first Fruit Bowling Tournament, which is being staged by the Grimsby Lawn Bowling Club on the Main Street Greens on Saturday afternoon next.

With good weather a bumper crowd is assured. The executive say that they have received twenty-four entries from out of town rinks and together with the various district and local rinks the greens will be all taken up.

Every player who attends will receive a sample basket of fruit, and the winners are to receive fruit. This will indeed serve to advertise Grimsby as the centre of the fruit belt.

Water Fountain To Be Erected

Chamber of Commerce Will Place Drinking Fountain on Vasant Lot on Main Street.

The Chamber of Commerce, with the aid of C. J. Eames, the town council and the water commission will erect on the vacant ground between the Bank of Commerce and offices of the Dominion Power a public drinking fountain. The benches already placed at this spot by the Chamber of Commerce are of benefit to the travelling public as well as to citizens, and with a drinking fountain it will become even more popular. This spot is used extensively by the travelling public while awaiting to board buses and street cars.

The fountain already in front of the Dominion store will be moved to a spot in front of the fire hall early in the spring.

Parents are requested to see to it that children do not damage these drinking fountains in any way.

Another Car Crashes Into Rockery

Main and Elm Streets Was the Scene of Another Mishap Sunday Morning—Damaged Car Sold for \$5.

Another car came to an abrupt stop on Main Street West on Sunday morning at 11 o'clock, when trying to make the turn at the corner of Main and Elm Streets. It ran up onto the rockery in front of the residence of William Farrow, knocking the stones out and destroying the flower bed. The car was so badly smashed that, after paying for the damage to the flower bed, the customs duty to clear the car, the owner sold it to a local garage man for \$5.00 and continued his journey to Uncle Sam's country on the C. N. R.

The noise of the impact was so loud that soon a large crowd collected, expecting to find the occupants badly hurt, but such was not the case. The driver received a slight cut on the head, but was otherwise unharmed. It again opens the question: Is it the driver's fault or the fault of the corner itself? About a dozen cars have done the same thing so far this year.

Chicken Thieves Again Visit Grimsby

Sunday Night Thief or Thieves Made Several Raids on Local Chicken Pens.

Chicken thieves again visited Grimsby on Sunday night and several citizens report loss of poultry. A large number of valuable birds were taken from the henhouse of Thomas Little, 4141 St. Catharines. Thieving of chickens in this district is becoming very prominent and the thieves are becoming bolder every week. Sunday indicates that they came practically into the heart of the town and looted chicken houses.

It is evident that the local police are making every effort to cope with the situation. Both Chief of Police Wentworth and Provincial Constable MacKay are working on many calls but up to the time of going to press the thieves have not been apprehended.

The officers, in an effort to trace the stolen birds, have asked local poultry buyers to be on the lookout for strangers wishing to dispose of poultry. Even with the co-operation of the buyer the police do not seem to be able to trace the stolen birds and they are of the opinion that birds taken here are removed to distant places for disposal.

COMING EVENTS

The dance at Grassie's Hall on Tuesday was well attended. There will be a real treat next Tuesday night, when a four-piece orchestra from St. Catharines will provide excellent music. Everybody welcome. Ladies provide lunch.

SMALL CROWD HEAR REPORT OF ENGINEERS ON SEWAGE SYSTEM

Petition Against the Sewers Will Not Stop Their Construction Under Local Improvement Act—Sewers Can Be Laid on Streets Where Two Thirds of the Property Owners Representing Half of the Assessed Valuation of the Adjoining Property Sign a Petition for Sewers. Dr. A. McClenahan of the Provincial Board of Health Addressed Meeting—Mayor Hewson Acted as Chairman. Opportunity to Oppose Sewer Constructions Was Not Taken at the Meeting.

Very few citizens turned out to the meeting in Moore's Theatre on Friday evening last to hear the engineer's report on sewers for Grimsby. Owing to the small turnout it is hard to state whether the town is in favour of or against sewers. By the questions asked by those present, the majority, if not all, were in favour of sewers. No one appeared solidly against or even said that sewers were not needed. On the street however, the subject is more thoroughly discussed and there are those both for and against the issue, while there are others who content themselves with saying, the council will do what they please anyway and there the matter rests, so far as they are concerned. Then again there are those of the opinion that sewers cannot be laid at the figures quoted owing to the rocky formation of the ground. Those in favour hasten to acquaint this element with the fact that the engineers have opened up test holes at the various places in town, and that they too are aware of the rocky formation of the ground.

The council evidently sought by means of a mass meeting to obtain the opinion of the ratepayers in regard to sewers. The small turnout could be taken as favorable for sewers and though not turning out the people were evidently willing to abide by the decision of the council. No doubt the council feel their position very keenly with a seeming lack of interest on the part of the citizens, not only on the important issue of sewers but in other municipal matters.

The sewer question however now remains in the hands of the council and the ratepayers. The council through issuing a proclamation summoning the people to the mass meeting gave them an opportunity of voicing their opinion either for or against the question and their opportunity of registering against the issue has gone. If two thirds of the owners representing one half of the assessed value of any one street petition for sewers the council will have no alternative but to grant their requests. A petition against the work by others would not stop its construction. Therefore the council gave the citizens their only opportunity to register their disapproval of a sewer system.

Upon receiving a petition for sewers from any one street the council will not doubt commence immediately to act upon it by the laying of the trunk sewer and the erection of a disposal plant, according to the plans as outlined by F. A. Dallyn & Co., the engineers.

Those on the platform at the meeting were: F. A. Dallyn and D. H. Fleming, consulting health engineers of Toronto. Dr. A. McClenahan of the Provincial Board of Health, Mayor A. Hewson, Reeve H. Fonger and Clerk G. G. Bourne, representing the Chamber of Commerce. The following is a detailed report of the entire proceedings at the meeting:

Mayor Hewson opened the meeting, explaining that the meeting was a citizens meeting and asked for some one to nominate a chairman for the evening. That the Council had called the meeting for the benefit of the citizens, and that Mr. Dallyn, Fleming and Dr. McClenahan were there for the purpose of answering questions. He expressed regret that there were so few present. Asked for nominations.

Mayor Hewson was nominated and the motion seconded.

Mayor Hewson: The Council has been taking the matter up year after

year. A number of people need sewers and a number can get along without. The Council has brought the matter before the people to decide. Called on Reeve Fonger.

Reeve Fonger stated that the people were well aware that part of the town was badly in need of sewers, especially the central portion. He had himself been down in the main streets and found water and sewage and an odour, and that the middle part was badly drained during the spring with water lying on top of the ground in sight. Outlying districts did not need sewers as there was natural drainage, but that the central part had no natural drainage. The approximate cost as given at \$10.00 was a good investment for the ordinary householder. The adoption of such a measure would certainly bring in new people. The taxes are not made by the Council but by the people themselves in their demands. He explained that Dallyn & Co. had made the report of the work free of charge and that they would not receive anything unless the town decided to put in sewers.

Mayor Hewson asked Dr. McClenahan to speak.

Dr. McClenahan expressed his pleasure in being able to accompany Mr. Dallyn to Grimsby and stated that the installation of sewers came in the realm of Public Health. That there were three very important things from the Public Health standpoint:

- (1) Safe water supply.
- (2) Safe milk supply.
- (3) Safe and sanitary sewage.

Grimsby already has safe, healthy, palatable water supply, of the milk question he stated that the only safe milk supply was a properly pasteurized method. Of the sewer question he stated that where there were not sewers there was a tremendous lot of trouble from cess-pools which if they overflowed caused trouble through the transmission of germs from one to another by personal contact and also through fly contamination. That the installation of sewers finished all problems of surface waters, increased the value of your property whether for sale or for rent, and might increase the revenue from the water supply, and would be a great step in advance for the municipality.

Mr. Dallyn was called on to speak next.

Mr. Dallyn said that the matter came under two headings.

First: Whether Grimsby was desirous of having a sewage system.

Second: Whether Grimsby could finance it.

He stated that Grimsby was the only town of its size with the exception of Ingersoll without a system and Ingersoll was without because of its location and sandy soil. That the town was being retarded in its natural expansion by the lack of ordinary developments of town and city, that ordinary lots were not large enough for septic tank, and that builders were deterred for lack of sanitary conditions. Mr. Fleming's plans and estimates for the cost were very accurate and within 10 per cent. of what the system would cost. That a 50 or 60 foot frontage would cost from \$10.00 to \$12.00 per year and that most people could save that amount. The figures for the town of \$90,000 might look large but per se as \$12.00 per year and \$2.00 for those who did not enjoy the privilege it did not seem so much. That it would be absurd to design a disposal system for only the central region because the outlying

(Continued on page 4)

Boy Injured In Runaway

Grimsby Lad was Knocked Down At Beamsville Fair Saturday.

When a horse bolted at the Beamsville Fair on Saturday and the buggy which it was drawing struck him, Leonard Mino, aged 12, son of Roy Mino, of Grimsby, had a narrow escape from serious injury or death. He was given immediate medical attention, and was later taken to his home with bruises and a general shaking up.

The horse, owned by G. T. Webber, of St. Catharines, became frightened. It is said, while an attendant was changing its harness, and made a sudden dash through a gate and down a runway. Mino, was standing at the gate when the horse dashed through. One of the wheels of the buggy, it is believed, struck the lad and knocked him to the ground. Another chap who was near Mino was able to jump back before the horse or buggy ran.

Several children were playing near the road down which the horse ran, but they miraculously escaped from the path of the frightened animal. Adults gave chase but there were few near the horse at the time and a deep ditch finally stopped the quarter-mile dash. No one was injured but the latter was smashed to pieces but the horse was not injured to any great extent.

Local Telephone Users Surprised

Telephone users have been agreeably surprised, when asking for a number, to hear the operator say "Thank you".

The adoption of the words "Thank you" has become general by the Bell Telephone Company and was introduced into the local office on Monday morning. The custom will serve to show the public that the operators, representing the company, appreciate their patronage. It is the common practice of store and bank clerks and business people to say "Thank you" and the Bell Telephone Company are now showing the same courtesy to their patrons.

BIBLE THOUGHT FOR THE WEEK

Love and Hate:—Ye that love the Lord, hate evil:
He preserveth the souls of His saints; He delivereth them
out of the hand of the wicked.—Psalm, 97:100.

AN ELOQUENT ADDRESS

Not long ago, in these columns, it was pointed out that in the making of speeches, brevity has an eloquence all its own, and that the man who really has something to say, can say it without the necessity of making a long-winded address. A striking example of this was afforded at the opening of the Vancouver annual meeting of the Canadian Chamber of Commerce this week, when the president, S. B. Gundy, of Toronto, delivered the shortest presidential address in the history of a Canadian trade organization. He only uttered a few words but in these few words he said a great deal. His address was in two sentences:—

"Let us put aside provincialism. Let us think of Canada as a whole."

This might well have been the text for a lengthy oration on the necessity of all the people in every province of Canada sinking their sectional differences in an effort to promote the best interests of the whole Dominion, but President Gundy preferred to give only the text, and to let his hearers draw their own conclusions. It was a text worthy of study, for no country, no matter how great, can realize its highest destiny if its various sections are animated by suspicion, jealousies and strife against each other. Unfortunately, there have been strong indications of this in Canada in the past, for east and west, the maritimes and the central provinces, have not always pulled together as they might have done. The message of Mr. Gundy was a timely one, and it was of just sufficient length to sink deeply into the minds of the trade leaders to whom it was spoken, and on whom rests much of the responsibility for putting it into concrete action.

ADVERTISING BRINGS RESULTS

The greater use of newspaper advertising as the best means of building up the savings and loan business was urged by one of the prominent speakers at a recent conference of the Pacific Coast Savings and Loan Companies held in Portland, Oregon. Backing up his argument in favor of newspaper advertising, the speaker quoted figures showing the results of a co-operative advertising campaign which had been conducted by the associations in southern California. In six months, this campaign gave the ten associations an increase in assets of \$22,740,583, or forty-six per cent. greater than the normal gain would have been without advertising.

These figures speak for themselves, and show that newspaper advertising carries more weight than any other form which is used. What is true in this particular line of business is true in all lines, and this is but one of the many instances in which big business executives have testified to the value to them of newspaper publicity, and their experiences can be enjoyed by all individuals and concerns in business, whether large or small. The newspaper has a tremendous appeal to all classes of people, and the messages sent into the homes through the daily press carry with them the weight of the newspaper's influence, which is in itself a strong factor in creating better business for those who use this medium to seek it.

MAKING PROGRESS

The League of Nations is decidedly making progress. When the session of the assembly opened last week, the delegates from the Netherlands and from Poland were determined to put forward a proposal to outlaw all wars of aggression. This was viewed at first with a certain amount of alarm and suspicion, but as the session has developed, these views have been seized upon by others, and have been enlarged upon at some length.

At Tuesday's session, Dr. Loudon, who is the president of the League of Nations Preparatory Disarmament Commission, went even farther than the proposal, for he urged that the resolution be reframed to condemn not only wars of aggression, but all wars of whatever nature. Following him, Paul Concor, of France urged the necessity for security from war as an essential towards disarmament. These declarations, following upon the German resolution to pioneer the cause of world peace, and M. Briand's eulogy of the German attitude, are impressive. They show a growing desire on the part of the great powers to take seriously, as they have never done before, plans to make war impossible. It may be a long time before this becomes a reality, but progress is being made, and the present session of the League assembly is doing much to justify the existence of that body.

PUBLICITY PAYS

Premier Ferguson, in an address at a directors' luncheon of the Canadian National Exhibition, has declared his faith in the value of publicity in the bringing of business to Ontario. His declaration was made, to a certain extent, in reply to criticisms which have been made of the provincial government's expenditures of advertising the attractions of Ontario for United States tourists. Although one million dollars have been spent for that purpose, the premier believes that the expenditures have produced results which are well worth while, and which have fully justified the amount of money set aside for this purpose.

The result of this publicity, according to the premier, is to be seen in the tremendous volume of tourist business which is being done by the merchants of Ontario, in the sale of Ontario products to those from the other side of the border. This business has now reached so great a volume that it is listed as one of the biggest industries of the province, and it is not too much to say that the

publicity efforts of the Ontario government are largely responsible for this condition. The announcement of Premier Ferguson places him definitely in that progressive class of citizens which believes in the value of publicity, and is convinced that money spent in advertising is an excellent investment.

BRITAIN'S RECOVERY

Only a year ago, Great Britain was in the throes of a great industrial upheaval which disrupted trade and commerce, stopped the wheels of industry, and cost the country tens of millions of dollars. When the last British budget was brought down by Winston Churchill, the chancellor of the exchequer, the effect of this was seen in the huge deficit which had to be announced. At that time, there were some fears for the financial and economic structure of the state, but these fears have been proven groundless.

In a speech made a few days ago in Scotland, Mr. Churchill made the astonishing statement that the recovery from the industrial and financial upheaval had been so rapid and complete that it would not be necessary to increase the taxes to take care of the added burdens. This is a remarkable proof of the great powers of recuperation of the British nation, and shows that there need be little fear of the people there failing to meet the heavy problems which face them, and to overcome them with the same courage and fortitude as they displayed in the darkest days of the war.

THE DUTY ON MAGAZINES

The department of national revenue has not acted any too quickly, nor any too drastically in placing a duty of twenty-five per cent. on forty-nine different magazines of the purely fiction type which come in from the United States. As a matter of fact, it is rather difficult to understand why the duty of this amount was placed upon them. There was no question of doing so to raise revenue, for that would properly come under the heading of a budget change, and, in any case, with revenues increasing as they are, the department has no need to recourse to further taxation for this purpose.

If the duty has been imposed upon them because of a desire to limit their sale in Canada, because of the nature of their contents, it will fail utterly in its object. The twenty-five per cent. duty will not exceed five cents on even the most expensive of the magazines named, so that it will not serve the purpose of keeping them out of this country. Yet, in the announcement of the duty, it is suggested that this is one reason for it, for the Ottawa despatch says that the periodicals involved run the whole gamut of thrill, romance and adventure, from stories of the underworld to stories of the screen, and that they tell tales of the dream world and unravel the mysteries of crime.

Some restriction of these magazines has long been sought by Canadian publishers of periodicals, and by various societies, of both men and women, in this country. The arguments against them are that they interfere with the development of purely Canadian magazines, and that they are detrimental to the morals of the young people of this country. Both of these arguments are largely true but the purpose aimed at, that of restricting the sale of these publications in this country will hardly be attained by a mere twenty-five per cent. duty. The only way in which the circulation of material of this type can be restricted is by an absolute ban or its entry into the country.

"THE WORLD MUST DISARM"

The attitude of the world of today with reference to wars was vividly illustrated at the League of Nations Assembly meeting in Geneva a few days ago, when M. Vandervelde, the Belgian foreign minister, in a stentorian voice, declared to the assembly, "The world must disarm." News despatches state that this declaration was greeted with great applause by the representatives of the nations, which composed the League of nations, as was his statement that wars of aggression are a crime against humanity.

There can be no doubt as to the attitude of the great majority of the people of the civilized nations of the world regarding war. There is not a civilized people in the world today which has not a feeling of revulsion towards it, and that is the reason why so much stress is being laid on proposals for disarmament. The spirit for this purpose is present, and in great strength, but apparently, while the spirit is willing, the flesh is weak, and therefore the great objective of disarmament is being kept off in the distant future. There is still too great a fear that one nation may be able to steal a march on another, and this alone is holding back the free and open discussion of disarmament. The present sessions at Geneva seem to be leaning, however, in the right direction, and the applause which greeted the Belgian minister's declaration gives an indication of how anxious the statesmen of the world are to find a solution of the problem.

THE CRUSADE FROM THE NORTH

The coming to Toronto from Northern Ontario of a caravan of 1,500 persons, embarked on a crusade to stimulate interest in that great north country, is a magnificent gesture which should have the result which is desired. In spite of the efforts which have been made in recent years to place the possibilities of the north before the people of old Ontario, there is still a lamentable ignorance as to the great part which that section of the province is destined to play in its future development. The untold wealth of minerals and of agricultural land, which lie in the northern sections of the country need only development in order to pour prosperity into the lap of the older and more settled sections. For that development, the north depends on the south, and the crusade which has been undertaken will do much to show old Ontario that the new section of the province seeks support in its projects.

The crusade, too, is noteworthy in that it marks the opening of the new provincial highway which injects itself into the heart of the north country. There can no longer be any complaint of lack of means of communication between the old and the new Ontario. This new highway means more to the north than any other road which has been built in Ontario, and it will play a tremendous part in the remarkable development in New Ontario which is sure to come within the next few years.

Notes
On Current Events
(By Peter J.)

At least one of the leading journals of the United States has lately awakened to the almost complete breakdown of the administration of criminal law in many parts of the country, and in an article entitled "We Flout the Laws We Make," the author, Mr. Flout, asks the question, "Why do we pass laws only to flout them, and why do we ignore laws which we insist upon enforcing?"

In attempting to answer these two vital questions, the author says: "That we do violate the law on a wholesale scale our most cherishing friends hardly need proof. The crime committed in the United States is the records of all the organized crime and low life story is the story of a more frequent and less certainly punished than anywhere else in highly organized society."

"Laws designed to control business are honored as the breach as in the case of the long generations we strove to prevent the development of big corporations, but the statutes were chiefly vanity. Every man has automobile laws which only feeble-minded would think of. Any motorist who literally did the speed regulations would be intolerable nuisance to other drivers even if he were 'not actually' at fault for obstructing the traffic."

"Our 'White' act has been used chiefly by criminals as an instrument of blackmail. Its plain terms are unenforced, and they are unenforced. Our laws are a national scandal, and everywhere in the United States the National and State laws relating thereto, are utterly defied. Even in small cities of the West, the very centre of prohibition, liquor is sold to strain hotels and often served in public rooms. This is a strange and repulsive spectacle and its cause deep in the sources of our nation's crime."

"We have lawlessly substituted righteousness for liberty. We enact measures designed to make us good or better, but that liberty is as important as morality and that the Government is our protector against them. Others may do as they please, but we must not let them do as they please. The object of government is to guard us in the enjoyment of life and not to save us from the consequences of our own sins and follies."

"The fact that an objective is good does not mean the government's passing a law. We must do many things for ourselves, individually and collectively, and cannot rely upon the government to carry out our wishes. We can and do place ourselves in our own hands and responsibilities to

public authority, but we succeed chiefly in bringing more laws into disuse and contempt. Never in our history have we needed more to use our heads in the making of our laws and their unmaking as well, since a law unenforced is a source of corruption.

"Don't ask for laws to make yourself or somebody else better. Demand the repeal or modification of those laws which in their very nature are unenforceable and therefore doomed to decay. The best statute is merely the description of a good custom and in fact the only laws people obey are those in harmony with popular habits. Long ago it was observed that a statute which runs contrary to custom is doomed to failure. Let the government keep to its proper tasks, carry out its own responsibility, and you will aid mightily in removing the stigma which long has characterized us as being the most lawless of all civilized peoples."

No truer, more fearless, or more timely article has, in the writer's opinion, ever appeared in any journal in the United States on the subject in question, and the writer can personally corroborate many of the statements made therein. It would have been almost impossible—without due regard to international courtesy—for any Canadian to have written such an article, however well informed he might be. It also contains a great warning to our own people for—extraordinary as it may seem—many of our own Canadian people have looked with longing eyes at the very laws so truly and strongly condemned in the above article and have even sought to have them enacted here.

The City of London, Ontario, is to be congratulated on having decided to teach politeness in its public schools, although in all probability the children of London are not any more remiss in this respect than a large percentage of them in other places, for it is a fault common to most young countries, and even in the older countries of the world, the young people of the present age have been charged with its neglect. Politeness, however, is a distinct asset to anyone possessing it, boy or girl, man or woman; and nothing is so likely to win the favorable comment of strangers. Indeed a person lacking it may be compared to a flower without scent.

Eugene Field, the poet, once sat at a dinner party in London, England, when the lady next to him said she understood that America was a region inhabited by wild animals and barbarians. "Yes," replied Field, "when I was caught I was up a tree."

A parallel case was the reply of Mark Twain to a similar lady who asked him if he had seen the Queen yet. "No, madam," he replied. "I was out when she called."

Fruit Growers Meet At Burlington Farm

Owner Gives Talk on Methods Used in Caring for Orchard.

Burlington Sept. 18: An orchard meeting was held at the farm of George Gallagher, Main Road, this afternoon, when about 100 fruit growers and officials from all parts of the Province attended, including W. A. Ross,

of the Vineland Experimental Farm; P. W. Hodges, of Toronto, head of the Ontario Fruit Department Branch; H. T. Foster, President of the Ontario Fruit Growers' Association, and J. E. Johnson, Simcoe.

Mr. Gallagher gave a talk on the treatment the orchard had received during the season. He stated that 100 pounds of nitrate of soda had been applied to each tree, and four complete washings applications were made with an additional application about the end of August to control the aphids, which has caused considerable loss to the growers throughout the Province this year. The large crop of extra quality apples in the orchard

showed the splendid results of the season's operations. The party also paid a visit to the Bethune orchards, which had received similar treatment.

God always, everywhere, and all in all—Southley.

True friendship's laws are by this rule expressed; welcome the coming speed the parting guest.—Pope.

A friend may well be reckoned the masterpiece of nature.—R. W. Emerson.

If life seems dull, maybe you will see the reason if you look in the mirror.—Southley.

Satisfaction in Selection

There exists in all of us a certain amount of native vanity, in that we feel that our judgment in matters affecting our own requirements is superior to that of a stranger. And this is quite in order and absolutely justified. We know the requirements of our own business as to quantity required; we have, by experience and actual practice, concluded that a certain grade, color or quality suits our purpose best.

In Printing

We have made our choice, and usually know pretty well what we want and how we want it. Co-operation in securing this can best be obtained from the home printer, for it is his desire, in fact his duty, to see to it that he secured for you just what you want, and that he carries this regularly in stock. In printing, also, your wishes can be carried out by consultation and co-operation.

The carpet-bagger, however, will always try to sell many times your ordinary requirements; he will most likely try to work off a job lot of paper. And as for style of work, since there is no chance to consult, and as no proof is submitted, the customer must take it as supplied, regardless of his own ideas.

Therefore, in order to get what you want, and when you want it, in the matter of your printing requirements, consult with

THE INDEPENDENT

Local Items of Interest

To-day is the last day of the annual Fenwick Fall Fair.

Many attended the Beamsville fair on Saturday last.

A real assortment of Pasco's Paradise Fruits and assorted cut fruits with real fruit flavors are at the Grimsby Bakery.

J. M. Lawrie, the local horse fancier, and Dr. Green of Stoney Creek acted as judges at the Beamsville races.

Local fruit shippers have commenced shipping large quantities of grapes.

Many carloads of pears have left the icing platforms of the Growers Cold Storage plant en route for England.

There will not be any more outdoor concerts given by the Band this season.

The Water Commission has ordered several new water meters and they

The Prevalence of FAR SIGHT

This error of vision is probably more frequently met with than any other. And in addition to being so prevalent, it is very detrimental. It is present at all ages, the majority of children being to some extent far-sighted. There is but one way to correct far-sight—placing glasses before the eyes that overcome the error. We have success in such cases.

Davidson of Dundas will be the speaker, and he will illustrate his talk with lantern slides. Mr. and Mrs. Milligan will sing a duet. All are specially invited.

The annual school fair will be held at the Grimsby Beach School tomorrow. Pupils from several schools in the community will demonstrate their handiwork and present a program of drills and singing.

Arrangements have been made to have S. L. Henley police Palmer's Hill during the time that children are going to and from school, until arrangements are completed for a permanent appointment.

A very enjoyable corn roast was held at the lake shore from the house of Miss D. Hayhoe, when friends were present from Buffalo, Hamilton and Grimsby.

A very successful dance was held in the Deer Park Golf and Country Club House on Saturday evening, September 17th. There was a large attendance, many out of town guests being present.

Parents and teachers had a very successful meeting in Grimsby Beach Park School on Friday 16, of September. They are hoping to organize a home and school association. Why not other schools in the district follow their example if they have not already done so?

35 YEARS AGO

On Tuesday morning the office of John H. Grout & Co., Grimsby, was entered and the safe cut to pieces. The burglars were doubtless much disgusted at finding only \$2 as a reward for their laborious exertions. Mr. Grout had taken all the money out on Monday evening.

Small Crowd Hear Engineer's Report

(Continued from Page 1)

regions would insist on being included. He had found while in the Department for the Provincial Government for 16 years that where sewers were laid in sections of towns and cities that it was only a matter of two or three years when other districts wanted to be included.

The one feature of the whole system was that the men now employed at the water pumping station would also look after the air compressor that operated the disposal plant, thus saving the cost of labor and a compressor pump.

Mr. Fleming was called upon and read the report.

After reading the report Mr. Fleming stated that the cost in such cases was usually met by a thirty year debenture and the arranging of a temporary loan from the bank to pay the contractor monthly. That the interest for such a loan was included in the estimate, every article of expense, even to advertising was included. He explained that the material used was indestructible and that a 30 foot frontage at \$2000 would cost \$9,82 and 100 foot frontage \$19,64.

Mayor Hewson then asked for questions.

Mr. R. Wadge: How would sewers pass the creek on Gibson Ave.

A: The usual method was to sling a steel pipe under the bridge and support up to it.

Mr. C. Durham wanted to know if outlying districts had any right to vote on the matter.

A: Their opinion should not affect the case. Such matters are usually done by petition of those who wish to get the work done. The Council might take a vote as to whether the citizens wished to have sewers or not.

Mr. J. A. Wray: What type of sewer pipes are to be used?

A: Vitrified tile or McCracklin pipe. McCracklin pipe is now used all over the Province. Should allow either company to bid and give it to the lowest tender.

Mr. C. J. Eames: Is it possible to force sewerage on the Town? What power has the Government to force it?

A: The Department has the power to force sewerage where conditions are such to demand them.

H. Metcalfe: How near are they to forcing it on the Town?

A: Dr. McClenahan stated that he was not in a position to say what the Provincial Department might order. If an epidemic was to break out the Department might order it, but that as far as he knew such action was not contemplated on the part of the Government. That the Town would be well advised to put in a sewerage system as there is always a possibility of infection from sewage. That citizens should consider cost, but if, on the other hand, it by the establishment of sewers, sickness could be saved, or a single life, it would be worth the cost of a sewer. Mayor Hewson stated that he hoped the Council would not be forced to put in sewers and would not like to have the Council force sewers on the people but would much rather

see them solve it first. Mr. Eames: What portion have to petition to get in sewer?

A: The Act defines it. Two-thirds of the value and a majority of owners. The proper procedure is to petition for local improvements. The same thing applies to outlying districts.

Mr. Sunley: John Street is in the Eastern area. If John Street wishes to join up before the others, what about charges?

A: It is necessary to get a majority of the owners to sign. You can keep adding to the area as long as you can get a majority from any area. The Council by a two-thirds vote can put it through.

H. Walker: Is the fall natural from the Western section?

A: From the Western section we could go back as far as Kidd Avenue. Follow along Main and Livingston.

H. Falkner: What about Fairview.

A: That will be the most expensive area owing to its scattered and isolated condition, when it is built up a little more the cost per foot would be less than at present. But you can have them if you petition.

Gordon Hannah: Get the shovels and picks and let's start.

Reeve Fonger: Why are you considering the central area first.

Mr. Fleming: The reason we have considered first the central area is because it is well built up and because no individual has a large frontage to pay for whereas on Fairview Ave. each man has a big frontage. The central area can take care of itself and outlying areas can be left to themselves.

Mr. Sunley: Why would not Ontario street get sewers if carried?

A: The sewers go by another street. Ontario can come in any time by petition.

Mr. Christie: Why could not the disposal plant be further removed from the point of contamination, the creek at the outlet of the lake?

A: Must be at the low point of system or it must be pumped. It might have gone between Maple and Elm, but your creek is now highly polluted and with a sewer system this condition will be removed.

There being no further questions the meeting was then thrown open to give those who wished an opportunity to view the plans and see the provisions made to take in the outside areas not included in the estimate.

Mayor Hewson: If the outside districts wish to install sewers a petition from two thirds of the property owners affected is sufficient to authorize the Council to lay the sewer.

C. J. Eames: What portion have to petition to get in sewer?

A: The Act defines it. Two-thirds of the value and a majority of owners. The proper procedure is to petition for local improvements. The same thing applies to outlying districts.

Mr. Sunley: John Street is in the Eastern area. If John Street wishes to join up before the others, what about charges?

A: It is necessary to get a majority of the owners to sign. You can keep adding to the area as long as you can get a majority from any area. The Council by a two-thirds vote can put it through.

H. Walker: Is the fall natural from the Western section?

A: From the Western section we could go back as far as Kidd Avenue. Follow along Main and Livingston.

H. Falkner: What about Fairview.

A: That will be the most expensive area owing to its scattered and isolated condition, when it is built up a little more the cost per foot would be less than at present. But you can have them if you petition.

FROZEN RICE PUDDING

Two tablespoons rice, 1-3 cup sugar, 2-4 cup cream 2-4 cup milk, yolk of 1 egg, 1-4 teaspoon of vanilla.

Wash the rice and cook in boiling salted water until tender. Drain; then add the milk and cook in double boiler about 30 minutes. Press through a sieve and pour over the egg yolk and sugar beaten together. Return to the double boiler and stir until it thickens. Remove from the fire, cool, add the flavoring and freeze. Whip the cream and add when the ice cream is nearly frozen. Leftover cooked rice may be used (about 6 table-spoons).

C. STANLEY PETTIT

The death of C. Stanley Pettit occurred in Toronto on Monday September 19th. The deceased, who was a son of the late Rev. Charles Pettit of Cornwall and nephew of the late Hamilton Pettit of Grimsby, was born in Grimsby, afterwards going to Cornwall and latterly living in Toronto. He is survived by his widow, two daughters and one son. Interment was made in St. Andrew's Cemetery this morning.

"CONSISTENCY, THOU ART A JEWEL"

Citizen, to school principal, who has the reputation of being fond of children:

"Well Mr. Smith, I hear you scolded Tommy Jones for stepping on the fresh cement walk in front of the school; how's that, when you're such a lover of children?"

"Oh, the fact is, Mr. Brown, I like them in the abstract, but not in the concrete."

Died

At North Grimsby on Sunday, September 18th, George Douglas, in his 63rd year. Funeral took place from his late residence on Tuesday, September 20th, with interment in Union Cemetery, Smithville.

GRIMSBY, ONTARIO

Obituary

DAVID ORTON CROWE

Death removed one of the most highly respected residents of North Grimsby on Monday last in the person of David Orton Crowe. His death came quite unexpectedly, although he had been in poor health for some time past. The deceased was born in Glaford sixty-nine years ago and came to North Grimsby some thirty years ago, and became one of the best known fruit farmers in the district. He took a keen interest in the affairs of North Grimsby Township and the County in general. He leaves to mourn his loss his widow, one daughter, Mrs. Clarence Shelton, Grimsby and two sons, Orton of Toronto and William at home. The funeral took place at 2:30 this afternoon, and was largely attended, interment being made at Queen's Lawn Cemetery.

GEORGE DOUGLAS

After a very brief illness there passed away in North Grimsby on Sunday George Douglas, one of the township's most prominent citizens, who took a very keen and active part in the municipal life of the community, that interest being responsible for his being elected a member of North Grimsby Township Council on several occasions. The deceased was in his sixty-third year and is survived by his widow, one daughter, Catharine and two sons, Richard of Niagara Falls, N. Y., and George at home. The funeral took place from his late residence Tuesday afternoon, interment being made at the Union Cemetery, Smithville.

Band Concert

The Grimsby Band gave their first outdoor Sunday Concert at Alexander Park on Sunday evening and it was said by many to be a real concert. The various numbers rendered by the band were greatly enjoyed and applauded.

Power (first making it for half an hour), which put the broken power, cover with a which grated cheese and pepper to taste, and brown over the top and brown.

AGE DISH

Layers of cabbage, potatoes, onions, in a case, butter, salt, pepper and salt; about of water. Let cook for the oven. Take off the fire the last half hour.

ade Jellies

ent kinds of jellies the very often finds the result to be somewhat unceremonious the jelly refuses to become sticky, or so the crops up. However, Preserving Fruits and the Home, distributed by the Department of Agriculture, Ottawa, tells how to make good jellies to have fruit that contain acid. The best fruits for jellies are those which contain ingredients in the proper proportion, such as apples, grapes, plums, strawberries, blueberries, blackberries, and raspberries.

WEDDING

HAZLEWOOD-CHISHOLM

A very pretty wedding, which was an event of much social interest, took place at Wymwood, Toronto, at 3:30 o'clock on Saturday, September 17, when Miss Elena Marion Chisholm, only daughter of Mrs. and Mr. J. R. Chisholm, became the bride of Mr. Harvey Eaton Hazlewood, of Port Colborne, only son of Mr. and Mrs. R. M. Hazlewood, of Grimsby. The spacious drawing rooms, where the ceremony took place, were tastefully decorated for the occasion with palms and ferns and autumn flowers, forming a beautiful and appropriate setting. The bride was escorted by her father, the bridegroom by Mr. Norman Chisholm, brother of the bride. Mr. C. Lewis and Rev. Dr. Wm. H. Hincks, pastor of High Park United Church, assisted by Rev. A. A. Smith, also of Toronto. Mrs. D. O. Arnold, a cousin of the bride rendered a violin selection, "At Dawning", and Mr. O. L. Clapperton sang, "All Mine Alone". After the signing of the register, the guests, who numbered about sixty, were received in the green room by the bride and groom and their parents. The mother of the groom wore gray and the bride wore a gown of black velvet, while the bride's mother was attired in beige crepe and the bride wore a gown of black velvet. The bride's mother was attired in beige crepe and the bride wore a gown of black velvet. The bride's mother was attired in beige crepe and the bride wore a gown of black velvet.

The bride and groom left for a honeymoon in Muskoka. The bride's travelling costume was a smart gown of reseau green, with hat to match, and long grey coat. On their return they will reside at Port Colborne, Ontario. Out-of-town guests were present from Port Colborne, Grimsby, Kitchener, London and Newmarket.

POLY

A NIAGARA

Heavy with haerages and melts free into the mass of a either hand.

The full day re the luminous land.

In one long noon reverie. Now hath the hare and gone with glee.

The shaven fish smooth and clean and purple and green, and soft gray.

Chequered with a Farther still I see

Town and dim viaduct road-tops fill

The distant mist, catch the view.

Thorold set sultry plateau and hills

And far to where you pointed towers

Rise faint and red the vaporous blue.

Saint Catherine, the host of flowers.

The Book of

In his brilliant romance, "The Power and the Glory," Sir Gilbert Parker has made a masterpiece of adventure, the life and sufferings of Robert O. St. John, one of the great explorers of this continent. He had the support of Count de la Roche, then

time during the interrogation nodded off to sleep unconcernedly.

Francis Jung, 13 year old son of the murdered woman, peered through a window of the cottage and saw a whip descending upon her body. He ran for help and his cries were overheard by Jones.

Prince Will Welcome Canadian Farmers

Montreal, Sept. 21.—Canadian farmers, livestock breeders and representatives of co-operative organizations who join the Canadian National Railways Marketing Tour to Europe this winter, will have an opportunity of sampling the hospitality of the Prince of Wales, if His Royal Highness is able to carry out his present intentions when the farmers' party reaches London in January next.

During his stay in Montreal recently, the Prince was informed of the plans for the farmers' tour and indicated his desire to receive the party at his home in London. In a letter written by his secretary to Dr. W. J. Black, Director of Agriculture for the Canadian National Railways, the Prince expressed his pleasure at the plans of the farmers to visit England, and stated that if circumstances permitted he would make every effort to receive them when they are in London.

receive them when they are in London.

The Royal Canadian farmer, who himself is now full-fledged member of the Alberta Wheat Pool, will be particularly interested in receiving the party, inasmuch as it will include fellow-farmers from his own province of Alberta as well as from other provinces.

No Bail For Elderly Man

63-Year-Old Port Colborne Citizen Faces a Serious Charge.

Port Colborne, Sept. 20.—A prominent local citizen, 63 years of age, whose name the police will not yet divulge, has been arrested and is being held in Welland Jail on a serious charge of assault on three young Port Colborne girls of five and seven years of age. Bail has been refused by the crown attorney and the accused will face the charge in to-morrow's police court.

According to what The Standard could learn this morning the assault took place in the home of the accused, and the arrest was made after the children had told their parents who in turn informed the police.

THE SIGN OF SERVICE

"Canada's Finest Range"

In every particular of construction and beautiful finish, the Westinghouse Electric Range reflects the care and skill of the great engineering organization whose name it bears. Perfect heat control facilitates perfect cooking. Westinghouse heating elements give more and quicker heat for the same amount of current than any other on the market. The scientifically designed and insulated oven effects economy both in food and in power. Seamless and enamelled, with racks and trays readily removable to facilitate cleaning.

Spend Less Time in your Kitchen!

Cooking electrically with a Westinghouse Electric Range will give you more leisure. It makes cooking cleaner and easier—requiring less attention.

Take advantage of Our September Offer \$5 Down

Balance on convenient terms

How many hours of your life does your present cook stove claim?—and such uncomfortable hours too! Put an end to this today. Spend less time in your kitchen—more time in the fresh air and sunshine, shopping or at the theatre. For only \$5.00 down and the balance on exceptionally easy terms you can have a beautiful Westinghouse Electric Range put in your kitchen to make your cooking better and easier than you ever thought possible. A size and style for every requirement. COME IN TO-DAY

THE WEEK'S NEWS OF THURROUNDING DISTRICT

BEAMSVILLE

The Clinton and Louth annual fair for 1927 is over and a check-up shows a splendid year. The exhibits in the main hall were considered ahead of previous years, both numerically and in quality. The showings of horses, cattle, sheep, swine and poultry exceeded expectations, the poultry house being filled to overflowing. On Saturday some 1000 people attended.

School Parade

The school parade included ten of the surrounding sections: No. 1 Clinton (Lake Shore), No. 2 Clinton (Thirly), No. 4 Clinton, No. 5 Clinton (Grobbs), No. 7 Clinton, Vineland school, Beamsville public school, No. 6 and No. 1 North Grimsby and the boy scouts from No. 1 North Grimsby. In the school drill competition for graded schools the class E. M. Comfort of Thirty school won first, while M. Ghent's class in the Beamsville public school was second. For one-roomed schools Lake Shore school (Clinton No. 1), with Miss Flora Clinton as teacher, won first place, and Grobbs school, Miss Betty, was second.

Grafton Baby Show

The Grafton baby show created much interest, there being 34 entries, each of which tried to display a different temper. Three school nurses, acting as judges, chose the daughter of Mrs. E. C. Meister, of Beamsville, to head the list. The second was a Lonsbury boy and the third a Prentiss daughter.

In the horse show ring J. C. Cosby of Wellandport won for carriage teams and for the smartest team, the latter winning the T. Eaton Co. silver cup. The Grafton & Co. special for general purpose teams went to A. P. Kinney, St. Ann's, and second to Culver Bros. of Wellandport.

Ben Caughell, St. Ann's, had the best double turnout, while Wilson McPherson & Son, also of St. Ann's, won for roadster teams.

Best Lady Driver

The best lady driver was decided to be Mrs. D. P. Hoag, of Danville, and Miss Margaret Armstrong of Beamsville proved best lady driver.

E. A. Armstrong of Beamsville had the best single roadster and G. P. Webber of St. Catharines the best single carriage horse.

The Royal Bank of Canada cup for the best dairy cow went to W. E. Boughner of Beamsville. At the C.N.E. Mr. Boughner was awarded first prize with the same cow.

Bank of Commerce Cup

The Canadian Bank of Commerce cup for collection of fruit went to C. H. Prudhomme, while the Jordan Winery special for basket of Concord and Niagara grapes was won by T. G. Mould, Grimsby East, and Mrs. D. Thompson, Jordan, was second.

For a collection of peaches the T. Eaton Co. gave a special cash prize, which went to C. R. Shore, Beamsville.

The Ontario horticultural experimental station special for collection of fruits and vegetables from one farm went to T. G. Mould, Grimsby East.

Horse Bolts

Some excitement was caused on Saturday afternoon when a horse belonging to G. P. Webber, St. Catharines, dashed from the infield across the race track and out of the main gate. It is said that the horse was being changed when the horse made a dash for freedom.

Boy Injured

As it went across the track a lad about twelve years old, Leonard Mino, son of Roy Mino, Grimsby, was struck by the wheels of the buggy. The horse continued out to the street, where it went into a deep ditch. The buggy was smashed to pieces, but the animal was soon caught.

The boy was knocked to the ground and his head cut at the back and on the side. His hip was also badly bruised. The lad was taken home by his father.

General Notes

Miss Alice Smith has joined the school teaching staff at Swatara, Ont., in the Kirkland Lake country.

A boy, son of Peter Edmonds West, of town, fell from a plum tree on Saturday, his left arm being broken.

Joseph Foley wife and daughter, of Toronto, are visiting friends in Beamsville.

Termy Fairbrothers, of the Canadian Bank of Commerce head office staff, Toronto, spent the weekend with his parents, W. D. and Mrs. Fairbrother.

Charles Garrett, London, England, arrived in Beamsville on Saturday. He is visiting Mrs. Perry, King street.

Dr. Ross Howell, Jarvis, is holidaying with his uncle, George Howell, at Thirly.

Howard and Mrs. Lloyd, of Toronto, were visitors here over the week-end.

FRUITLAND

The excavation for the new Sunday school is progressing favorably. The members have undertaken this part of the work themselves, and the ladies as their share are providing hot dinners for the workers. H. C. Gummo, contractor, of Hamilton, has the contract for the raising of the church and the building of the Sunday school at the cost of \$3,000. The Ladies Aid have undertaken to finance the installing of new seats for the church when completed.

The cemetery board felt very grateful to the H. G. & B. railway, through the influence of Mr. Waller, for the neat fence surrounding the cemetery. The C.G.I.T. spent a very enjoyable social evening at the home of Mrs. Jacobs on Friday evening.

STONEY CREEK

Fire of unknown origin completely destroyed the house owned by Mrs. Broatch, Fruitland, situated east of the village. When discovered about 4 o'clock Saturday morning, the flames had gained such headway that any efforts to save the building were unavailing. It had only been built about six years. The family occupying it were away at the time, and no one was around. The furniture was also a total loss. It was partly covered by insurance.

The laying of the base for the permanent road to be built on Lake avenue is being rushed by Walter Beatty who has it in charge. Already half of the work has been done, the fine weather aiding materially in the work. On Webster's side road, where the new is to be made, connecting the present highway with the Beach, nearly all the grading has been done, and most of the ditches completed preparatory to laying the cement surface on the road.

T. D. Harrison & Son are preparing to erect another greenhouse to add to their already large establishment.

The weather of the past week has ripened up crops wonderfully, tomatoes especially coming forward now in large quantities, some of the canning factories being taxed to capacity to take care of the crop. Heavy shipments of plums have been made all week by the dealers, the demand being generally good for all varieties. Next week will practically end the plum crop. Bartlett pears have been coming on the market in large quantities the quality being not as good as usual owing to the pear fly, which has had the effect of depressing prices considerably. Elberta peaches and grapes are now ready to pick.

At a special meeting of the high school board held on Wednesday evening, Miss Nephews was elected as teacher. This brings the teaching staff up to six, the number of pupils attending compelling the trustees to

take this step. The subjects in the new building will be tuition of the tr of the school. The next meeting will be held on Monday school class enjoys a beach. Games Insp was around up new signs provided on the Cleveland. It is his intention to one found shooting or reserve.

The church is progressing members themselves week and excavated and laid the drains, the refreshments. Mr. attractor, of Hamilton, let of completing the sets to finish it by Xmas.

The C.G.I.T. held a winter breakfast at Jacob's beach.

J. Parier, at a serious operation in hospital, is slowly recovering.

John Sher his farm to Mr. Hunt of he will take possession. Mr. Sheritt intends to move with his family.

Mr. John adolescent after his uncle.

W. and J. of Fergus were guests here on Monday.

Harold L. is visiting friends in B.

Hugh M. A. Parker, Fruitland, is wedding of their niece's Millen of Stoney Creek.

Friends of Davis, formerly of & Sons, will be glad to secure a position for a large business concern.

SMITH

The Hamilton of the Presbyterian church meeting which convened the last Wednesday, confirmed extended by the congregation.

Herbert G. Scott, local members, much the calling of their work here, although the fact that the city has been without a three different occasions in past three years.

R. and Mrs. family of Caledonia, Sunday afternoon and evening of Dr. and Mrs. W. C. Carr.

Mrs. H. J. Nelson, relatives in Port Colborne, for a few days last week.

Miss Norma is attending the Stamford Institute at Lundy's Lane, the advantage of the commercial work offered in that school.

The Rev. and M. Whitelaw returned from their home at Woodlawn, last week, having spent a most enjoyable season there.

Mr. Whitelaw, most of the week-ends for the winter, St. Catharines.

A number from the community attend of the convention of the Evangelical association held at the church, Winslow, on Tuesday last week.

The lists of the Agricultural fair, to be held at the Agricultural park here, on Tuesday, September 26 and 27, have been issued. F. W. Smithville.

is the secretary, and copies may be obtained from him. Robert E. Pook's new residence on Main Street north, is almost complete in outside work.

Cyril Copeland has been appointed corn-borer inspector for this county.

BINBROOK

Sanford Evans is home after being in hospital.

Jim and Mrs. Ridge and daughter, Mary, of Hamilton, were Sunday visitors at C. Ridge's.

Miss Pearl Evans and Miss Mary Bartlett attended the G.H.P. wedding in Hamilton on Saturday.

The United W.M.S. meeting was well attended on Wednesday afternoon.

Miss Mary Bartlett is staying at Abington, looking after the work for her brother, Hugh, and his wife, who are on a motor trip to Atlantic City and New York.

Keneth Young spent a couple of days in Hamilton.

Judges Find a Faker at Fair

False Bottom Was Used in Butter-Making Contest.

(From St. Catharines Standard)

Niagara Falls may have its power, St. Catharines its industries and Grimsby its peaches, but the mighty town of Beamsville has its tricksters.

It was all over last night that one lone woman brought this honor to the town, and today all Beamsville is smiling over the "craft" of its female resident, who entered the five-pound buttermaking competition in Saturday's fair with a false-bottom tub and half a pound of butter.

Judges were about to give her first prize and crown her "Buttermaking Queen of Niagara," but, alas, one quick his tester in a little too deep and unearthed four and a half pounds of wood and rags. Spectators gasped in amazement. Some smiled, some giggled.

BIG GAME HUNTERS' PARADISE

Upper—On the Lookout for a Kill—With a gun full of trophies of moose and caribou, the Thompson brothers expect a big season this summer. Lower left—Getting the game. Thompson brothers, famous guides in the Canadian Pacific Rockies, are shown in the photograph were planted from views to the west, was killed at Bear River, near Barkerville, B.C. Here he is with his last, second to none of the Thompson brothers. Lower right—Don't Want a Perry. A Caribou coming from shore to shore, covered the water.

Norman Thompson and his brother, of Barkerville, British Columbia, are considered among the best hunting guides in the Canadian Pacific Rockies. They took a banker hunting last fall and after winding their way up a mountain creek Norm. asked the banker if he would like to find his way back. "Not on your life," said the man of dollars and cents. "I tried to follow this trail back I would get cross-eyed and fall out of the saddle."

The latter had what he called the "most wonderful time in my life" going out in the hills. "Later he got what he went after, a moose, a caribou and a tricky grizzly. Two years ago Norm. showed a fellow three grizzlies and 51 caribou, setting up camp only about nine miles from town."

Only some of those who have explored the Canadian Pacific Rockies for game can convey to the

uninitiated the joyous lust in the heart of the hunter. The glorious monarch of the forest running swiftly, head erect, chest heaving, nostrils dilated. The next minute the ruler of the forest is dead.

Never will he roan his head again or breast the rolling waves in crossing lakes and streams and rivers. No more will he know the sweet, fragrant odors of woods and forest. His great heart broken, the bull moose is majestic even in death.

Perhaps some few months later his head will see the library of a man's home in a city. Then the hunter may remember the thrill of the first hunt and the capture of his first prize. But in the meantime, the hunters go onward. The Rockies are also the playground of caribou and grizzlies, and the visitors are plentifully supplied with trophies before they turn back toward civilization.

Galt Provided Winner and Third Man In Trial Marathon on Saturday

Cliff Bricker Led Field of 25 in Long Grind, Beating Harold Webster, Second to Finish, by Almost Seven Minutes; Reynolds Third; Johnny Miles in Ninth Place; Morton Forced to Quit After Being in Third Place at 22 Miles.

Any doubts that might have existed as to the Galt boy's superiority over all and sundry in this vast Dominion of ours were certainly dispelled in Saturday's Canadian Olympic marathon trial, under the auspices of Hamilton Olympic club, when the youthful marvel showed a clean pair of heels to a field of twenty-five, among them Johnny Miles of Sydney Mines, the pride of Nova Scotia.

Harold Webster of Hamilton Olympic club, making his first attempt at the marathon distance, finished second, with Billy Reynolds, also of Galt, in third place.

Miles, who was second choice for the honors, could do no better than ninth. As in the Boston marathon of last April, the heat greatly affected him, and he found it necessary to walk for long stretches.

Bricker's time for the 26 miles, 285 yards was two hours 51 minutes and 46 seconds. Webster got home in 2:58:32, almost seven minutes later. And Reynolds was 12 minutes 19 seconds behind Webster.

Of the 25 who entered the grueling struggle in the hope of catching a place on the Canadian Olympic team of 1928, 25 toed the scratch. Three failed to put in an appearance, and one Edward Skelding of Hamilton, could not pass the physical examination that is necessary for all long-distance events.

Tom Ellis of Hamilton was also turned down by the examiners, but he refused to make himself scarce. He completed and finished in thirteenth place.

Nineteen runners completed the distance, which was a truly surprising number considering the terrific heat.

Time Was Satisfactory
Although the winner's time of 2:51:46 was far from record-smashing, the Canadian Olympic committee officials who were present expressed themselves as well pleased, taking into consideration the fact that the weather was all against fast time and that Bricker, after the first 12 miles ran alone and made his own pace. Had he been pressed even a little bit he could have clipped considerable time off his figures, for he was running well within himself throughout and was quite fresh when he finished.

"Brick" ran an even and well judged race. For 11 miles he stowed with half a dozen others and made no effort to "bustle them along, but just before reaching Winona he let out a notch and took command. Charley Morton of Hamilton tried to stay with him only to fail, and from the twelfth mile on Galt's best known resident had matters all his own way.

Webster Was Surprised
The real surprise packet of the race was Harold Webster, Hamilton Olympic club's good middle-distance campaigner. Previous to Saturday, Harold had never attempted the marathon distance. And when he started out, with the hot sun beaming down its best heat rays, very few, not even his intimates, felt that he would be able to go the route.

That he could cover the 26 miles 285 yards under such conditions, with a dinky leg and no previous experience over such a distance was an eye-opener to the large crowd that thronged the route and filled Scott Park.

And that he could finish second to a boy of Cliff Bricker's wonderful ability and stamina was further cause for joy to Hamiltonians in general and Hamilton Olympic club in particular.

Certainly, it was a remarkable display of grit on Webster's part and a triumph for the coaches, Billy Sherring and Billy Melody, who urged him to tackle the long race.

Within a twelve-month Webster should develop into a high-class marathoner. He needs only proper coaching for he has about every requisite for a top-notch.

Well Managed Race
The Canadian Olympic committee made no mistake when it placed the marathon trial event in the hands of

Hamilton Olympic club. It was a wise move.

The Hamilton officials left nothing undone to make it one of the greatest races ever run in Canada. There wasn't a single hitch and the Olympic committee, with Chairman P. J. Mulqueen as the spokesman, warmly congratulated the men who so ably arranged and carried out the many details.

Scott park, scene of the start and finish of the marathon, as well as the athletic meet that was staged in connection with the big event, was filled and it was estimated that close to 5000 were present. Along the route there were large numbers out to cheer the competitors on their way. And automobile owners helped in the success of the venture by keeping off the course. Very few, except official cars, accompanied the runners.

Young Lee Takes Lead
With the crack of Mayor Treleaven's starting pistol, little Ezra Lee, the infant of the grind, rushed to the front, with Johnny Cuthbert in close pursuit. Bricker Miles, Webster, Morton, Reynolds and Hughes made up the second flight, all bunched.

This order continued as long as the runners were on the track and Lee was first to take to the road. At Bartonville Lee was still in the van, but the others had closed in on Cuthbert and half a dozen were stopping along side by side. Lee continued to set the pace until Red Hill was reached, but at that stage the others shot past him.

Through Stoney Creek, past the St. James monument and on through Freetland the six "horsemen" continued with none showing any signs of distress and all appearing to find the pace to their liking. Not more than a foot separated any of 'em as they sped along. The rest of the field was well strung out and far behind.

Two Break From Pack
Between Freetland and Winona Cliff Bricker decided that, fast as the boys were travelling, the gait wasn't quite as speedy as he liked, so he quickened his step and pulled away. Charley Morton, acting under instruction from the Hamilton Olympic club coaches, piled on speed at the same time, his idea being to step up with Bricker. The pair ran along together through Winona village, down the side road to Barton street and for a considerable distance after making the turn toward home, leading the way by 150 yards. Webster, Reynolds and Frank Hughes came next in that order.

Morton Couldn't Hold Pace
Although Charley Morton's intentions were of the best, the strain of staying with Bricker was too great for him and, after the Galt star had opened up a margin of close to 200 yards, the Hamiltonian weakened and stopped to walk. He was on the verge of calling it a day but encouragement from the spectators along the route prompted him to break into a jog again. He ran for half a mile then stopped again and Webster, who had pulled away from Reynolds and Hughes and had been gaining steadily on Morton, passed him at the 16 mile mark.

Pluckily, Morton tried it again. At the 17-mile post, where the course took a turn toward Van Wagner's beach, the order was Bricker, Webster, Morton, Reynolds, Cuthbert, Hughes, Miles, Garbutt, Potter, Weyer, Drury Lee Dellow. The others were far behind but plugging along with great courage. Miles, who appeared to be feeling the heat more than any of the other lads, walked up the hill to the turn and it was only when the crowd of spectators at that point shouted words of encouragement to him that he started to run again.

Morton Drops Out
With Bricker in possession of a comfortable lead, the field kept plugging along for the remaining nine miles, all but Morton, who finally had to "chuck it" after going 22 miles.

Ovation for Bricker

Bricker's arrival at Scott park occasioned a wild outburst from the crowd of 5000, who had stayed after the athletic meet was finished to see the knights of the road return.

"Brick" as fresh as the proverbial daisy, jogged around the track five times without changing his stride and each time he passed the grand stand and bleachers he was roundly cheered. When he completed the fifth lap he was surrounded by admirers and carried to the entrance of the dressing rooms, amid a wild demonstration.

Some kindly chap threw an overcoat over him, but Cliff tossed it off and in less than a minute he emerged from below the grandstand with his suit coat covering his dust laden running togs. He stood at the finishing mark, drinking cool cocoa while Harold Webster, the second man home, was completing his five laps, and applauded him each time he circled the track.

Webster was also accorded a remarkable reception, the spectators showing their appreciation for his wonderful display of grit. He finished almost seven minutes behind the Canadian champion, but this was regarded as a real feat for the reason that it was the Hamiltonian's first attempt at the marathon distance and few expected him to go the route.

How Others Finished
Twelve minutes after Webster finished, Billy Reynolds, running mate of Bricker, hit the tape. His time was 3:10:51. Then came Percy Weyer, diminutive Toronto lad, in 3:17:25. He had picked up considerable ground in the last few miles and had passed Cuthbert, Hughes, Miles, Garbutt and Potter. Hughes followed Weyer in 3:22:24, then, after a delay of almost seven minutes, came Potter, with Garbutt 16 seconds later.

Cuthbert in eighth place, made the trip in 3:21:16 and Miles got home in 3:23:38. The "blue-nose" sprinted the final half of the last lap and was given a big hand.

Nineteen Finished
Orville Garbutt of Toronto Gladstones was tenth in 3:34:06, followed in 3:36:17 by Lee, the "kid" who set the early pace and hurt his chances in so doing. Wilson, Ellis, Dellow, Dack, Hornby, Price, White and Spradbro completed the lot, the last three requiring over four hours to negotiate the distance.

A Little Bit of Everything
Dear Reader:
This column is to be known by the above title. In it will be recorded all the wise cracks of the week, and we invite our readers to contribute any bright sayings.

The young man with the pearl tie pin and wrist watch says that according to the latest fashion hints, new wraps for girls have ripple fronts. That being the case they are destined to break on a pretty bare shore.

WHY COLLECTING IS A BORE
Shed a tear for the collector. As a collector, he's a flop. She's a flop. —Boscript.

But have a try for the collector. As a collector, he's a flop. She's a flop. —St. Standard.

AGONY IN A MINUTE
The melancholy man, alight, alight, just this last. Can't wear the stretch longer. One overcoat along list of Christmas gifts is in the face, also an emerald, then there is that sewer, the last instalment on the hundred other things. We think about them, well, I like to sewer the whole lot.

USUAL SUNDAY
Hour 11 a.m.
Another large lot, beautifully mounted on my at the corner of Main and Weyers, surrounded by three wars.

TELL ME

Sally Short Story all this hubbub about the Art Gallery at the Art Gallery. However, one raised a huge. However, the art gallery would.

WHY
In the Bible days if she were motorizing a plate glass window.

NEVER
The average man of grown daughters. After a board of direct.

DEFINITION
A Beamsell that "a village is a place nobody will help you chase a hat."

SAFE
A Patton street when she finds herself street she walks backward she will be sure to see any her.

THE OF IS
To sewer or not.

DINER
Everytime you pool game, it costs you the sewer Grimsby it will thousand.

TAKE VOICE
Go up North for a deer, or stand on the Elm and Main Street.

ANSWER TO PONDENT
No, Imogene, have nothing to do with "under separate cover."

WHY COLLECTING IS A BORE
Shed a tear for the collector. As a collector, he's a flop. She's a flop. —Boscript.

But have a try for the collector. As a collector, he's a flop. She's a flop. —St. Standard.

TRUTH WILL OUT

The little boy en route to Grimsby from the Toronto Ex. in his coupe and who let the hum of passing motorists hush him to sleep, has been noted in the self same coupe, on Nelson Boulevard, put asleep, no doubt, by a wonderful Toronto lullaby.

DO YOU BLAME THEM?
That the small town weekly papers are usually as free from surplus cash as a mosquito is from pin feathers, is clearly illustrated in the following:

A Toronto tourist, staying in a certain small town, lost a valuable Alfreddale dog, so he went to the local newspaper office.

"When does your paper come out?" he inquired of the man who sat behind the office desk.

"Tomorrow," he was told.

"I want to insert an advertisement," he informed the man at the desk.

"Yesir," answered the man and in a few minutes the lost ad was written out, offering \$50 for the return of the dog.

Next day when the paper came out, the tourist could not find the ad. In the paper, so again went to the newspaper office. A small boy appeared.

"I want to see the editor," "Sorry, sir, he's out."

"Well, his assistant."

"He's out, too."

"Then may I see the foreman?" "But he's out too."

"Great Scott!" shouted the visitor. "Everybody out?"

"Yesir. They're all out looking for this 'ere lost dog!"

Hunting Wild Pig
(Continued from Page 7)

Their morning meal inside them. The mob makes for one end of a jungle which may be a mile or more in length, and the gentry with guns find places at the other, where there is a break of some kind between that jungle and the next. For some, collapsible stands are carried along and erected so that the sportsman has a good view from above, but many squat behind a bush or wear the reeds together to form a little shelter.

In the rear of the guns the aboriginal tribesmen will risk out long nets in front of which they squat, ready to fall with wild yells on some beast who becomes entangled. When all have got into position, the signal is given and the beat begins. With a crash the line crashes through the thickets, cheered by the sounds of drums, who are for the greater manufacture of noise mounted on little rats. If the wind is suitable, the jungle is burnt behind the beaters to encourage the pig from breaking back.

Elements of Danger
At the other expectation is stirred by the explosion of the bomb which marks the commencement of the beat, but the distance is great and the beaters can only struggle along slowly. After a time the tension relaxes, and one is startled to find that something has shown itself on the edge of the jungle and withdrawn again before it was really noticed. It was but a jackal, but it has served its turn, and the senses are alert for other beasts to follow.

Local Dehydration Plant to Operate

C. S. McGillivray, chief of the Dehydrating Department of the Dominion Government notified the Grimsby Independent that the local dehydrating plant would be open on or about October 3rd, when extensive experiments will be carried out. Large quantities of apples will be used this year. Associated with Mr. McGillivray at the local plant will be
